

Approved Pre-Feasibility Studies for 11 Municipal PPP Projects

The URT recognizes the role of private sector in bringing about socio-economic development through investments. Public-Private Partnership (PPP) frameworks provide important instrument for attracting investments. Indeed, Public-Private Partnerships (PPPs) have been identified as viable means to effectively address constraints of financing, management and maintenance of public goods and services

To facilitate the implementation framework, The URT formulated the PPP policy 2009, PPP Act, Cap 103 of 2010 (as amended) and PPP Regulations of 2020.

The PO RALG was vested with the power to oversee the Small Scale / Municipal PPPs including building the capacity of LGAs to undertake Public Private Partnership projects effectively and in efficient manner in compliance with existing policy and legal frame work. The small scale PPPs as per PPP Amendment Act of 2018 is defined as PPPs with a total capital investment of less than US \$ 20 Million.

This is to provide the information to general public that the PO-RALG has approved the following Pre-Feasibility Reports.
